## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, drawn to a blade assembly for a laryngoscope having first and second guide tubes, classified in class 600, subclass 190.
- II. Claims 7 and 8, drawn to a handle for a laryngoscope having ergonomic features, classified in class 600, subclass 197.
- III. Claims 9-12, drawn to a laryngoscope having a handle and a blade with a tube extension/retraction mechanism, classified in class 600, subclass 194.
- IV. Claims 13-20, drawn to a laryngoscope, classified in class 600, subclass 185.

The inventions are distinct, each from the other because of the following reasons:

Inventions IV and I, II and II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the laryngoscope is recited as having some, but not all, of the features of the subcombinations (e.g., the tube extension/retraction mechanism in claim 13 does not

require that the tube be used with a blade lacking tubes). The subcombination has separate utility such as a laryngoscope blade (with first and second tube or with a tube extension/retraction mechanism that does not require tubes on the blade) or a laryngoscope handle with ergonomic features.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
